Volume Contents

Volume 23 Number 1

Y. Du and K. J. Brown	1	Bifurcation and monotonicity in competition reaction–diffusion systems
V. S. Borkar and T. E. Govindan	15	Optimal control of semilinear stochastic evolution equations
J. D. Avrin and F. Rothe	37	Boundedness and decay estimates for a class of reaction–diffusion systems on $\mathbb{R}^n$
U. Gianazza	49	Regularity for nonlinear equations involving square Hörmander operators
D. Bahuguna and V. Raghavendra	75	Application of Rothe's method to nonlinear integro-differential equations in Hilbert spaces
S. Rybicki	83	A degree for S^1-equivariant orthogonal maps and its applications to bifurcation theory
K. A. Ames and L. E. Payne	103	Continuous dependence results for solutions of the Navier–Stokes equations backward in time
A. Damlamian, N. Kenmochi and N. Sato	115	Subdifferential operator approach to a class of nonlinear systems for Stefan problems with phase relaxation
F. Flores	143	The lack of lower semicontinuity and nonexistence of minimizers

Volume 23 Number 2

Hongjun Yuan	155	The Cauchy problem for a quasilinear degenerate parabolic system
D. O'Regan	165	Nonresonance and existence for singular boundary-value problems
E. Feireisl	187	Attractors for semilinear damped wave equations on $\mathbb{R}^3$

B. AULBACH, NGUYEN VAN MINH and P. P. ZABREIKO	197	Integral manifolds of a general model of evolutionary processes with impulse effect
H. ZOU	215	Asymptotic integration of over-damped second-order systems and applications to instability
J. G. DIX	225	Local solution for a degenerate hyperbolic equation with memory
A. CELLINA and S. PERROTTA	239	On minima of radially symmetric functionals of the gradient
T. WANG	251	Weakening the condition $W_1(\|\phi(0)\|) \le V(t, \phi) \le W_2(\|\phi\|)$ for uniform asymptotic stability
S. HEIKKILÄ and V. LAKSHMIKANTHAM	265	On the method of upper and lower solutions for discontinuous boundary value problems
M. BOUHAR and L. VERON	275	Integral representation of solutions of semilinear elliptic equations in cylinders and applications

Volume 23 Number 3

N. MADERNER	297	Continuously regulated control systems
J. RODRIGUEZ	307	Projection schemes and the alternative method for nonlinear boundary-value problems
YONG LIU	319	Axially symmetric jet flows arising from high-speed fiber coating
G. MAKAY	365	An example on the asymptotic stability for functional differential equations
XIANGSHENG XU	369	A unidirectional flow with temperature-dependent viscosity
L. E. PAYNE and G. A. PHILIPPIN	387	On gradient maximum principles for quasilinear elliptic equations
C. BU	399	The Ginzburg–Landau equation with nonzero Neumann boundary data
L. AMBROSIO	405	On the lower semicontinuity of quasiconvex integrals in $SBV(\Omega, \mathbf{R}^k)$

Volume 23 Number 4

G. LEONI	427	Existence of solutions for holonomic dynamical systems with homogeneous boundary conditions
I. B. MANDHYAN	447	The diagonalization and computation of some nonlinear integral operators
J. V. BURKE and M. L. OVERTON	467	Differential properties of the spectral abscissa and the spectral radius for analytic matrix-valued mappings
J. BEBERNES, S. BRICHER and V. A. GALAKTIONOV	489	Asymptotics of blowup for weakly quasilinear parabolic problems
G. SIMONETT	515	Invariant manifolds and bifurcation for quasilinear reaction–diffusion systems
S. M. SUN and M. C. SHEN	545	Exponentially small estimate for a generalized solitary wave solution to the perturbed K–dV equation

Volume 23 Number 5

M. REISSIG	565	The existence and uniqueness of analytic solutions for a moving boundary problem for Hele–Shaw flows in the plane
X. XU	577	A free boundary problem arising from reproductive toxic mass spreading
A. MATSUMURA and K. NISHIHARA	605	Asymptotics toward the rarefaction wave of the solutions of Burgers' equation with nonlinear degenerate viscosity
G. ADOMIAN and R. RACH	615	Modified decomposition solution of linear and nonlinear boundary-value problems
P. MARCATI and R. NATALINI	621	Convergence of the pseudo-viscosity approximation for conservation laws
D. CHAE	629	Weak solutions of 2-D incompressible Euler equations
H. HOSHINO and Y. YAMADA	639	Asymptotic behavior of global solutions for some reaction–diffusion systems
X.-Q. ZHAO and V. HUTSON	651	Permanence in Kolmogorov periodic predator–prey models with diffusion

C. De Coster 669 Pairs of positive solutions for the one-dimensional p-Laplacian

P. Isaza, J. Mejia and V. Stallbohm 683 A regularity theorem for the Kadomtsev–Petviashvili equation with periodic boundary conditions

Volume 23 Number 6

J.-P. Penot 689 Sub-hessians, super-hessians and conjugation

P. Blanc and S. Li 703 On a doubly degenerate equation arising in fresh–salt water flow with pumping

Yuan Hongjun 721 Finite velocity of the propagation of perturbations for general porous medium equations with strong degeneracy

N. Hirano 731 Existence of unstable periodic solutions for semilinear parabolic equations

L. Faina 745 Uniqueness and continuous dependence of the solutions for functional differential equations as a generic property

Zhao Zengqin 755 Uniqueness of positive solutions for singular nonlinear second-order boundary-value problems

X. Q. Yang 767 Generalized second-order derivatives and optimality conditions

Dao-Qing Dai 785 The Riemann–Hilbert boundary value problem for semilinear pseudoparabolic equations

I. Lasiecka 797 Existence and uniqueness of the solutions to second order abstract equations with nonlinear and nonmonotone boundary conditions

Volume 23 Number 7

J. S. Shin 825 Comparison theorems and uniqueness of mild solutions to semilinear functional differential equations in Banach spaces

S. Zaidman 849 Topics in abstract differential equations

R. Naulin and M. Pinto 871 Dichotomies and asymptotic solutions of nonlinear differential systems

C. M. Elliott and Tang Qi 883 A dynamic contact problem in thermoelasticity

T. KILPELÄINEN and P. KOSKELA 899 Global integrability of the gradients of solutions to partial differential equations

HONG-MING YIN 911 Blow-up versus global solvability for a class of nonlinear parabolic equations

M. M. COCLITE 925 On a singular nonlinear Dirichlet problem—IV

SANG RO PARK 937 The phenomenon of quenching in Burgers' equation with nonlinear boundary conditions

DAE HYEON PAHK and JIN KEUN SEO 949 Regularity for solutions of a certain elliptic equation near a nonsmooth interface

Volume 23 Number 8

J. JANUS and J. MYJAK 953 A generalized Emden–Fowler equation with a negative exponent

L. RECKE 971 Stability of bifurcating solutions of equivariant equations

K. TSURUTA 999 Asymptotic stability in functional differential equations with finite delay

W. M. MILLER 1013 Stability and approximation of invariant measures for a class of nonexpanding transformations

V. M. VELIOV 1027 Differential inclusions with stable subinclusions

L. GARDINI 1039 Homoclinic bifurcations in n-dimensional endomorphisms, due to expanding periodic points

Volume 23 Number 9

M. A. ASTABURUAGA, C. FERNANDEZ and G. PERLA MENZALA 1091 Local smoothing effects for a nonlinear Timoshenko type equation

GONG XUNHUA 1105 Connectedness of the efficient solution set of a convex vector optimization in normed spaces

YA. I. ALBER 1115 A new approach to the investigation of evolution differential equations in Banach spaces

Y. Lu	1135	Cauchy problem for a hyperbolic model
J. Mai and L. Wang	1145	On the integrity of kneading sequences of a C^0-family of unimodal functions
A. Cañada and A. Zertiti	1153	Topological methods in the study of positive solutions for some nonlinear delay integral equations
Shin-Hwa Wang and Fu-Ping Lee	1167	Bifurcation of an equation from catalysis theory
P. Biler, W. Hebisch and T. Nadzieja	1189	The Debye system: existence and large time behavior of solutions
M. Bertsch, D. Hilhorst, and Cl. Schmidt-Lainé	1211	The well-posedness of a free boundary problem for Burgers' equation

Volume 23 Number 10

Z. Weili	1225	Singular perturbations for third order nonlinear boundary value problems
W. Allegretto and P. Nistri	1243	Existence and stability for nonpositone elliptic problems
J. E. Muñoz Rivera	1255	Existence and asymptotic behaviour in a class of nonlinear wave equations with thermal dissipation
G. Katriel	1273	Surjection results for Fredholm mappings with singularities
Yuan-Wei Qi	1277	Global existence and uniqueness of a reaction–diffusion system via invariant solutions
K. Mischaikow and J. F. Reineck	1293	A product theorem for connection matrices and the structure of connecting orbits
R. Precup	1315	On some fixed point theorems of Deimling
Su Ning	1321	On propagation properties of perturbation in nonlinear degenerate diffusions with convection and absorption
M. Bartušek and Z. Došlá	1331	On solutions of a third-order nonlinear differential equation
M. Drakhlin	1345	On the variational problem in the space of absolutely continuous functions
U. G. Abdullaev	1353	Large-time behaviour of solutions of the nonlinear infiltration equation

Volume 23 Number 11

P. D. Loewen	1365	A mean value theorem for Fréchet subgradients
A. F. Ivanov	1383	On global stability in a nonlinear discrete model
Junyu Wang, Dawei Zheng and Xuekong Wang	1391	A free boundary problem for a convective reaction–diffusion equation
D. G. Costa and C. A. Magalhães	1401	Variational elliptic problems which are nonquadratic at infinity
A. A. Guetter	1413	On solutions of an elliptic boundary value problem with a discontinuous nonlinearity
C. P. Gupta, S. K. Ntouyas and P. Ch. Tsamatos	1427	On an m-point boundary-value problem for second-order ordinary differential equations
M. Fečkan	1437	A symmetry theorem for ordinary differential equations
K. Ishige	1453	Singular perturbations of variational problems of vector valued functions
Lihong Huang	1467	On the necessary and sufficient conditions for the boundedness of the solutions of the nonlinear oscillating equation
E. Stepanov and S. A. Vavilov	1477	Nonlinear resonance beam oscillations induced by shear forces
V. G. Angelov	1491	Corrigendum

Volume 23 Number 12

Sang Ji-Ye	1493	Multiplicity results and bifurcation for nonlinear elliptic problems involving critical Sobolev exponents
S. Carl and S. Heikkilä	1499	On the existence of extremal solutions for discontinuous elliptic equations under discontinuous flux conditions
A. Moudafi	1507	Parallel sum of nonlinear monotone operators and variational convergence

XIAOBING FENG	1515	Strong solutions to a nonlinear parabolic system modeling compressible miscible displacement in porous media
K. ITO and S. KAWASHIMA	1533	Asymptotic behavior of solutions to the Burgers' equation with a nonlocal term
E. A. GALPERIN	1545	Spherical algorithms and evaluation of the fixed point set
JONG-SHENQ GUO	1559	Large time behavior of solutions of a fast diffusion equation with source
B. LLANAS and C. MORENO	1569	Analysis of a model of elastoplastic shells displaying mixed hardening
G. MOSCARIELLO	1587	Local boundedness of minimizers of certain degenerate functionals of the calculus of variations
V. A. GALAKTIONOV	1595	Quasilinear heat equations with first-order sign-invariants and new explicit solutions
T. L. GILL and W. W. ZACHARY	1623	Corrigendum
